

ECE.653

STQAM

Software Testing, Quality Assurance, and
Maintenance

Winter 2018

Prof. Arie Gurfinkel

Instructor and TA

Instructor

- Prof. Arie Gurfinkel

Teaching Assistant

- NONE

Course Web Page

- <https://ece.uwaterloo.ca/~agurfink/ece653>
- LEARN: <https://learn.uwaterloo.ca>

Course Time and Location

Date: Monday

Location: MC 2017

Time: 8:30 – 11:20 AM

Grading

Assignments: 30%

Quizzes: 20%

Final Exam: 50%

Grades may be curved or adjusted at the Instructor's discretion

3 Assignments

- Pen and paper exercises, and
- Programming assignments
 - mostly in Python

Textbook and Lecture Notes

No required text book. Lecture slides and notes will be provided.

- <https://ece.uwaterloo.ca/~agurfink/ece653>
- LEARN: <https://learn.uwaterloo.ca>

Course Website & LEARN

The course website is the definitive source

- When in doubt, consult the web page
- Check syllabus for final grade computation

YOUR responsibility to check for updates!

- Course website
- LEARN (<http://learn.uwaterloo.ca>)

GitHub and Slack

We will use **GitHub** for managing and submitting assignments

- This requires a free GitHub account
- Follow the link in Assignment 0 to get started
- Let me know if there are any problems!!!
- GitHub Tutorial: <https://try.github.io>

We will use **Slack** for communication (don't use EMAIL if you can!)

- <https://uw-ece653.slack.com/>
- there are slack apps for Win/Mac/Linux/iPhone/Android – use them!
- Signup link is available on LEARN (or use your @uwaterloo.ca email)
- Create #channels for group discussion and DM for private conversations
- monitor #general for course announcements
- ask questions about assignments in #aN
- send DM to me and TA for a private question
- Share cool slack features that you find helpful with the rest of the class

Independent Work

All work turned in must be of that individual student unless stated otherwise.

Violations will result in zero credit to all students concerned. University of Waterloo Policy 71 will be followed for any discovered cases of plagiarism.

Policy on Late Assignments

You have 2 days of lateness for assignments that you can use throughout the term

- These are TWO days for the term. Not for each assignment!

Each day the assignment is late consumes one day of lateness

For example,

- You can be 2 days late on assignment A1, or
- One day late on A1, and one day late on A3, or
- You can hand all of the assignments on time 😊

Missed Quiz

If you miss a quiz, you will receive 0 for it. If you have a legitimate reason (at the discretion of the instructor) for not taking the midterm and obtain a permission from the instructor **a week** in advance, the percentage for the quiz will be shifted to the final.

See syllabus for more detail

AccessAbility Services Volunteer Notetaker Required

Interested? Complete an online application using your WATIAM:

<https://york.accessiblelearning.com/UWaterloo/>

More information:

Website: <https://uwaterloo.ca/accessability-services/current-students/notetaking-services>

Email: notetaking@uwaterloo.ca

Phone: 519-888-4567, ext. 35082

UNIVERSITY OF
WATERLOO

Is this course for me?

Not a TESTING course!

- Foundations of Testing / Coverage
- Foundations of Symbolic Execution and Symbolic Reasoning
- Foundations of Deductive Program Verification
- (Possibly) Foundations of Automated Verification

Enough background?

- Can you code? (Python?) <https://docs.python.org/2.7/tutorial/>
- Have you used a Unix/Linux machine before?
 - command line, shell, editor...
- Do you know Logic / Automated Reasoning?
 - Propositional logic: AND, OR, NOT, Boolean SATisfiability
- Do you have basic understanding of Compilers?
 - Control Flow Graphs, Operational Semantics, Intermediate Representation
- Have you used a SAT / Theorem Prover / Constraint Solver / SMT ?

Contact

Office Hours

- by appointment
- best time is before/after lectures

Email (email address on the course web page)

- <https://ece.uwaterloo.ca/~agurfink/ece653>
- Identify yourself
 - Originated from your uwaterloo email address, or
 - Signed with your full name and student ID
- Start **Subject** of email with **[ECE653]**

Use SLACK

A little about me

2007, PhD University of Toronto

2006-2016, Principle Researcher at Software Engineering Institute, Carnegie Mellon University

Sep 2016, Associate Professor, University of Waterloo

Automated (Software) Verification

Program and/or model

Alan M. Turing. 1936: "Undecidable"

Alan M. Turing. "Checking a large routine" 1949

How can one check a routine in the sense of making sure that it is right?

programmer should make a number of definite assertions which can be checked individually, and from which the correctness of the whole programme easily follows.

SeaHorn Usage

Example: in test.c, check that **x is always greater than or equal to y**

test.c

```
extern int nd();
extern void __VERIFIER_error() __attribute__((noreturn));
void assert (int cond) { if (!cond) __VERIFIER_error (); }
int main(){
    int x,y;
    x=1; y=0;
    while (nd ())
    {
        x=x+y;
        y++;
    }
    assert (x>=y);
    return 0;
}
```

SeaHorn command:

```
-> sea pf test.c
```

SeaHorn result:

```
SEAHORN
-----
PROPERTY (line 12) | TRUE
-----
TIME(ms)           | 0.06
```
