Please send any comments or criticisms to dwharder@alumni.uwaterloo.ca with the subject ECE 250 Questions 9.6.
Assistances and comments will be acknowledged.

- **9.6a** Compare the memory requirements and the possible limitations between using a chained hash table and an open addressing scheme.
- **9.6b** Would you recommend a chained hash table or an open addressing scheme for a hash table to be used in an embedded system?
