WATERLOO AERIAL ROBOTICS GROUP

The Waterloo Aerial Robotics Group is a team of University of Waterloo students who, with the support of the corporate sponsors (see reverse), are developing a series of fully autonomous flying robots for entry into the International Aerial Robotics Competition.

The objective of this multi-year competition is to push the envelope of technology by seriously challenging students to accomplish near-impossible mission objectives. The goal is to build a fleet of air vehicles capable of flying three kilometres, identifying target buildings, entering the structures and navigating inside to obtain visual indoor information. This must be done within a period of 15 minutes and without the help of any crew.

You are cordially invited to see your donation at work at the

WARG Sponsor Appreciation Day

Wednesday, January 15, 2003

6:00 pm - 7:00 pm (approx.)

Davis Centre DC - 1301 (Fishbowl)

University of Waterloo

The agenda will include a brief information session, a competition progress update, and a meet-and-greet, during which refreshments will be served.
